Re: East Harris County Deserves Prompt and Permanent Action

Dear Mr. Miller,

I am a resident of East Harris County, and we all know here that there are often problems involved in living near such a heavily industrialized area. It is the duty of the EPA and the local government to hold corporations accountable for pollution, whether it be by water or air. Given this, the EPA's continued delays for making a remediation decision about the San Jacinto River Waste Pits are unacceptable and may continue affecting the public health of residents near the San Jacinto River.

The time is now for you to decide on a permanent remediation strategy for the waste pits, and I support the Army Corps of Engineers report's conclusion that a permanent armored enclosure is the best and quickest way to protect our health in East Harris County.
